

Quality Management Systems

DSV Solutions

DSV Solutions is one of Europe's leading logistics companies. We provide supply chain management across borders. We design and implement dedicated and integrated solutions based on our customers' requirements.

An effective supply chain – efficient but still flexible – consists not only of storage, transport and handling services. A smooth information flow is equally important. And customer service is one of the cornerstones of our concept. We service not only our customers but also the customers of our customers.

Quality is important in all aspects and we work continuously to improve our processes. Since January 2011 DSV Solutions in Denmark has been ISO 9001 certified.

And in December 2011 we received the ISO 14001 and OHSAS 18001 certificates proving that we comply with internationally recognised assessment specifications for environmental as well as occupational and health safety management systems, respectively.

We constantly work to broaden and improve the solutions we offer to our customers and thus DSV Solutions is also AEO certified.

Global Transport and Logistics

DSV is a global supplier of transport and logistics services.

DSV has offices in more than 60 countries all over the world and an international network of partners and agents, which makes DSV a truly global player offering services worldwide. By our professional and advantageous overall solutions, the approx. 22,000 DSV employees recorded a worldwide annual revenue of 6 billion euro for 2011.
