COVID-19

European Market

At DSV, we are working hard at keeping our customers and suppliers updated on the latest impacts of COVID-19 within our industry, as well as keeping our employees safe.

Please find the latest updates herein regarding the current situation in Europe as it relates to Ports, Customs and Dock operations.

As for airfreight, which is an immediate concern - please know the situation is still quite fluid. Although flights from Europe have been suspended for passenger travel, DSV is completing a solution for cargo transport which we expect to announce as soon as possible. We kindly ask that you stay connected to your local representative.

General Overview by Country
